

Pot, tray and
substrate not incl.

IDEAL FOR GROWING IN OPEN TRAYS

FITS TRAYS FROM 80CM TO 100CM SQ

FOR POTS WITH A MAX DIAMETER OF 70CM

**PREVENTS RISK OF ALGAE
GROWTH IN OPEN TRAYS**

**STOPS EVAPORATION OF
NUTRIENT SOLUTION**

**REFLECTS LIGHT BACK ONTO
PLANTS - ENHANCING GROWTH**

**KEEPS TEMPERATURE STABLE IN
NUTRIENT SOLUTION AND SUBSTRATE**

AutoPot PlantSkirt is a light-tight, heat-reflective shield that protects nutrient solution and substrate from temperature fluctuation, algae and debris when growing in large open trays.

Paired with an AQUAvalve it provides a solution for growing even the largest of plants with AutoPot Watering Systems.

Multiple PlantSkirt modules such as this can be connected to a large reservoir

Above: PlantSkirt should be used in conjunction with 80cm-100cm sq trays. AQUAvalve, AQUAvalve Cover, fittings, pipe, PotSock, pot, tray and substrate not incl.

Using PlantSkirt with AQUAvalve™ and Garden Trays

Combine PlantSkirt with an AQUAvalve and Garden Tray to cultivate even the largest of plants with AutoPot!

Typically you will require:

1

PlantSkirt will fit trays from 80cm to 100cm sq. It accommodates a solid or fabric pot with a max diameter of 70cm.

Position your pot centrally in your tray.

Fill pot with medium and pot up plants. Water through pot and allow to drain.

2

Place AQUAvalve PotSock onto the tray.

Place AQUAvalve and AQUAvalve Cover into the AQUAvalve PotSock.

Connect the AQUAvalve to your water supply using 6mm pipe.

3

The PlantSkirt is secured around the middle of the pot and the outer rim of the tray.

Secure in place with the PlantSkirt's drawstrings.

4

Once the drawstrings are pulled tight the PlantSkirt provides an effective seal preventing light and debris from entering the tray.
