UPTHRIVE Grow Fertilizer	10 ml	ÉLAN Plant Booster	15 ml
PROSPER Bloom Fertilizer	—	SPARK Flowering Stimulant	5 ml

FOR SUPPLEMENTAL FOLIAR FEEDING

UPTHRIVE (nitrogen boost)
ÉLAN (improves plant energy & increases stress tolerance)
SPARK (potassium boost & triggers flowering)
Mix 1-2 ml / 1 L of water and apply weekly or as needed, only in vegging or in the first week of flowering

* KICKOFF Beneficial Bacteria

- mix 10 g per 10 l of soil before transplanting
- use once a week as a topdressing or mix 5 g per 10 L of water

! When growing organic, you do not necessarily have to worry about the **pH** and **EC** values. However, we recommend that you always measure these values to prevent nutrient lockup, reduce plant stress and get the best results.

According to this feeding chart, for hand-feeding applications only - use with native soil, coco-coir and planting mixes - dilute CRAZY HILLS™ Nutrients with water.

The indicated dosage is per 10 litres of water

Always shake the products vigorously before each use.

For crazy-good results - feed with every watering

This chart is only intended as a general guideline. Use rates and plant phase periods may be adjusted according to individual needs.

SCREW IT,
LET'S
GROW!

CRAZY HILLS
