POP UP CLOCHE COVER

This cover has been tailored to fit over the Garland Grow Bed but will work equally well if used independently. The contents of this product are as follows -

Qty	Item Description
1	Pop Up Cloche Cover
1	2 Part Elasticated Plastic Tube Section
8	Metal Ground Stakes

USER INSTRUCTIONS

Unpack the Cloche Cover. The integral spring wire frame will mean that the unit will naturally take up its general shape as the tension of the packaged shape is released.

Assemble the 2 Part Elasticated Plastic Tube, thereby creating a single 96cm tube section. Locate the stitched green section at the top ridge of the Cloche Cover and open the Velcro tab positioned at one end. Thread the assembled plastic tube section into the void and reseal using the Velcro tab.

If you are using the Pop Up Cloche Cover with an existing Garland Grow Bed, position it over the Grow Bed Frame. Alternatively, simply place the unit into your chosen position. Identify the eight anchoring loops at the base of the cover and use the supplied metal ground stakes to secure the unit to the ground.

The central zip door can be held ‘open’ by use of the two green ties at the top of the door section. Similarly, the roof vent window can be secured ‘open’ by using the tie provided to secure the clear panel which otherwise covers the vent window.
