

LMA-14

Lighting Control Adapter F

TrolMaster’ s Hydro-X system can control most of the horticultural lighting fixtures sold on the market today. Most light manufacturers provide the ability to control their lighting systems using what known as a low-volt control. That low-volt control can take many forms and communication protocols. TrolMaster makes several types of lighting adapters (LMA units) that allow the Hydro-X to control lights using their low-volt control option.

This LMA-14 lighting adapter is specially designed to control the HID's like Gavita/Nanolux/Luxx/Growers Choice/Illuminar/PL and LEDs like Fluence/Next light/Photobio;

Note: Each LMA-14 can control up to 40 HID lights or 24 LEDs. Additional LMA-14 adapters can be used with the SPH-1 to control as many lights as required.

Specifications

LMA-14

Input Voltage

Voltage	12V
---------	-----

Maximum Current

Current	0.05A
---------	-------

Working Environments

Temperature	32-122°F (0-50°C)
Humidity	≤90%

Package Dimensions

Size	6.14"/156mm(L) x 3.27"/83mm(W) x 1.18"/30mm(H)
Gross Weight	1.74oz/50g

Package Content

Lighting Control Adapter F (LMA-14)	1pc
-------------------------------------	-----
